SUMMARY

High-impact Quality Engineer (SDET) with 4+ years of experience architecting automation frameworks for Enterprise FinTech systems. Specializing in full-stack automation (Java) across Mobile (Appium), Web (Playwright), API, Database (Oracle JDBC), and Performance (JMeter). Experienced in CRM (ID & Syariah), CWS/Manulife ID, and high-complexity payment integrations with Rintis, DOKU, Xendit, and major banks. Drives SIT/UAT/REH/PAT cycles, builds scalable automation frameworks, and delivers cross-system E2E stability across CRM - SSIS - CWS ecosystems. Currently acting as the primary QA focal point for cross-border squads (ID/PH/VN) at Manulife, delivering 100% reliable payment gateways and reducing regression cycles by 85% through automated governance.

TECHNICAL SKILLS

- **Automation Strategy:** Java, Selenium Webdriver, Playwright (Java), Appium, UFT, Cucumber BDD, POM Design, Parallel Execution.
- **API & Backend:** REST Assured, Postman, SOAP UI, Oracle SQL, Data Integrity Validation.
- **DevOps & Security:** Azure DevOps, Jenkins, GitHub Actions, Docker, Snyk (Vulnerability Scanning), Wazuh.
- **Performance:** Apache JMeter, k6 (Load/Stress Testing), Payment Gateway Optimization (Rintis/DOKU/Xendit).
- **CI/CD:** Jenkins, GitHub Actions, Azure Pipeline.
- **Test Management:** Jira Xray, SharePoint, Confluence.

EXPERIENCE

Manulife Indonesia (PT. Asuransi Jiwa Manulife Indonesia)

Jakarta, Indonesia

Quality Engineer (QA)

February 2024 - **Present**

Core Responsibilities

- Own full testing lifecycle (SIT, UAT, REH, PAT) for CRM (ID & Syariah), CWS/Manulife ID, and Bancassurance systems (PAYDI Danamon PPPU, DBS MiWISE).
- Design and maintain Java-based automation frameworks covering Mobile (Appium), Web UI (Playwright), API (REST), and Oracle DB validation.
- Develop and execute comprehensive performance testing using JMeter across internal and external payment APIs (Rintis, DOKU, Xendit, Danamon, DBS).
- Govern sprint testing through Xray, delivering structured test plans, executions, and release documentation for 60+ CRM sprints.
- Architected a hybrid Java/Playwright/Selenium framework, integrating 75% of critical path tests into Jenkins CI/CD, slashing regression time from 1 day to ~1 hour (85% reduction).
- Secured 100% transaction success rates for Paylink (Rintis, DOKU, Xendit, Danamon) by engineering rigorous idempotent flow validation and retry policies using RestAssured API tests.

Key Achievements

- Built and maintained a 23 scenario Mobile Regression Suite for CWS/Manulife ID (Android/iOS), automating login, eWelcome flow, notifications, policy validation, and cross-system routing. Stacks: Appium & Java.
- Designed a 30 flow CRM UI automation suite covering Global Search, Customer/NonCustomer Case Creation, Child/Duplicate Case, KYC, Email queues, FCR reports, and policy/certificate validation. Stacks: Playwright & Java.
- Built automated tests for 52 CRM PDK API endpoints (mapping rules, validation, data consistency), also Payment API ecosystem (Rintis, DOKU, Xendit, Danamon, DBS) including: multi-endpoint flows, chained callbacks, async notification handlers, error-state validation. Migrated Postman collections into Java REST automation, enabling functional (with negative & callback chain verification). Stacks: Java REST & Postman parity.
- Executed JMeter load and stress tests for all payment-related APIs, validating: P95/P99 latency, callback stability, idempotency & retry logic, PSP (Payment Service Provider) SLA adherence. Supported gateway teams (Rintis, DOKU, Xendit) and bank partners (Danamon, DBS) in diagnosing throughput and timeout issues.
- Performance Tuning: Partnered with Backend Dev and Tech Lead to resolve API bottlenecks using Apache JMeter, improving payment endpoint latency from ~350ms to ~100ms.
- Enabled direct DB assertion through automation for: PDK contact updates, policy reference mapping, elderly flag logic, SSIS/ODS sync validation. Eliminated manual SQL checks and stabilized regression execution. Stacks: Oracle JDBC.
- Delivered cross-system E2E flows for CWS eWelcome and CRM integrations, validating: Notifications, team routing, subdomain mapping, IVR/SMS behavior, and data propagation through SSIS pipelines.

NexSOFT (PT. Paramadaksa Teknologi Nusantara)

Tangerang, Indonesia

Lead QA Engineer

May 2022 - February 2024

- Promoted from QA Engineer to Lead QA, managing a team of 7 engineers and overseeing the quality strategy for 3 enterprise-scale systems (NexCHIEF, NexCORE, NexSAM).
- Spearheaded the "NexCHIEF Automation" initiative, building a reusable OOP-based framework that increased test coverage by 40%.
- Managed critical Change Requests (CRs) and UAT governance, acting as the primary gatekeeper for production releases.
- Reduced production defect leakage by implementing strict Smoke and Sanity testing protocols prior to release.
- Led the QA team in resolving and estimating over 600 legacy production issues, enhancing system stability and reducing backlog through effective prioritization and cross-functional collaboration.

Meta / Facebook Lite (Freelance)

Remote

QA Localization & Functional Tester

July 2021 - June 2022

Project: Facebook Lite for Android – FBL4A

- Executed functional and localization testing for Facebook Lite on Android, focusing on payment flows under low-bandwidth network conditions (2G/3G).
- Identified and reported critical usability defects affecting the Indonesian user base, directly improving app stability for the region.

Previous Experience: Intern Network Support at **Telkom Indonesia (2019)** | Backend Intern at **PT. Sahaware Indonesia (2018)**.

EDUCATION

Institut Teknologi Nasional (ITENAS) Bandung

August 2015 - February 2021

S.Kom. – Computer Science and Engineering (Accreditation: A)

GPA/IPK 3.47

CERTIFICATIONS & TRAINING

Wazuh: Build Your SOC with Open Source SIEM (Siberku, 2025)

GitOps on Kubernetes (DevOps Focus Group, 2025)

BigQuery Data Insight Badge (Google, 2025)

Java QA Automation (Manulife & Taldio, 2024)

Google Cybersecurity Professional Certificate (Coursera, 2024)

Google Agile Project Management (Coursera, 2023)

Quality Assurance Automation (SanberCode, 2023)

Java Foundation & Programming (Oracle Academy, 2022)

Software Quality Assurance Engineer (JuaraCoding, 2022)

ORGANIZATION/SOCIAL EXPERIENCE

Volunteer: Manulife 'Bersih Desa' (2025) – Community development for rural sanitation facilities and promoted sanitation habits in Bogor alongside **Yayasan Manulife Peduli**.

Volunteer: Manulife Global Volunteer Days (2024) – Financial Literacy education event in Bekasi.

Speaker: "Understanding Quality Assurance" Webinar (Skillshare, 2024).

Trainer: Zero Waste Lifestyle Trainer (YPBB Bandung, 2020-2022).
